

Council Decides to Keep the Franchise

Declares For Municipal Ownership and Operation of the Street Railway Line

An important declaration on the city's policy with regard to the street railway proposition was made last night when the council went on record in a resolution which practically re-affirms the municipal ownership plan.

F. C. Jamieson, of Strathcona, as collector for the Strathcona Radial Tramway Company, went intimating that before his company was prepared to make any definite proposals or place any draft of agreement before the Edmonton city council they would like to know how the city stood on the main proposition, i.e. whether or not the franchise could be acquired. Mr. Jamieson intimated that there was no use in laying a draft agreement before the council if the council was predisposed to turn it down. He wanted to know if the city would give a franchise at all or not.

In reply to the letter Alderman Griesbach moved: "That it is not desirable that the street railway franchise of this city should be acquired by a private corporation."

Alderman Mays said he would like to have the report of the committee which was appointed to deal with the Strathcona Radial people.

Alderman Griesbach intimated that the committee had met the directors of the company, had heard them, and now asked them to prepare a draft agreement. This letter was their reply. They naturally did not care to submit an agreement unless they had some assurance that it would be considered.

Alderman Manson seconded Alderman Griesbach's motion, remarking that in the present stage of the city's history, he was not prepared to say that the city would give a franchise to anyone. He would prefer a full council to discuss the matter.

Alderman Mays said: "While the city has so many large public works to undertake which are absolutely necessary I think that under certain conditions a comparative 'luxury' like a street car line might be safely handed over to a private corporation for a term of years. I am not prepared to say that the franchise should not be turned over to a company provided we had the right kind of a company and the right kind of agreement. If we could get a percentage of the receipts and other conditions which we might require, I am not prepared, as I said, to say that the franchise should not be given to a proprietary company."

Acting Mayor Picard: "I am not prepared to vote for the motion, and at the same time I am not prepared to vote it down. It is a large question to be disposed of at this meeting."

Ald. Griesbach: "I am prepared to dispose of this now."

The motion was put and carried. Aldermen Griesbach, Manson and Smith voting with it and Alderman Mays voting against it.

Colorado Blizzard

FOUR DAYS OF SLOW FALL

Four Feet Of The Beautiful Fell In Some Parts Of The State

(Bulletin Special)

Denver, Colo., Oct. 23.—Eastern Colorado has been in the throes of a blizzard today but the weather bureau holds out hopes of clearing weather tonight. The storm centre has moved eastward. The storm takes rank as the most severe at this time of the year which the weather bureau has recorded. Snow began falling Friday night and continued about ninety hours. The actual fall here was twenty one inches. In some portions of the state it was four feet or more. Delay of freight and passenger traffic on the railroads is the principal damage done thus far.

NORTHERN POWER CO.

(Bulletin Special)

Vancouver, B. C., Oct. 23.—Rev. Dr. A. S. Grant, who arrived from Dawson yesterday is head of a company to spend a million dollars in revolutionizing power conditions in the Yukon. The company will acquire coal mines, generate electricity and supply dredges. The price of power, electric light and coal fuel will be cut in two.

APPEAL DISMISSED

(Bulletin Special)

Regina, Oct. 23.—The appeal in the controverted election case was dismissed. Chief Justice Sifton and Justices Newlands and Harvey ruled for dismissal and Justice Scott and Wetmore for the appeal. The dismissal of the appeal was from a decision by Judge Prendergast in the specific case of the Prince Albert city election. Some sixteen protests by both sides are thrown out by the decision of the full court.

RECRUITS SCARCE

Halifax, N.S., Oct. 22.—It is reported here on good authority that the West Surrey regiment coming to Canada in the spring to take charge of the garrison, which now is about four hundred men below strength. It is said it has been impossible to get recruits in Canada and it will be necessary for British soldiers to once more man this Canadian stronghold.

BELCOURT UNWELL

(Bulletin Special)

Ottawa, Oct. 22.—Hon. N. A. Belcourt is unwell and has left for the south on a six weeks' holiday.

A "Home Fleet"

ORGANIZED FROM THE RESERVES

No Ships Will Be Paid Off And The Present Strength Of Crews Will Be Maintained

(Bulletin Special)

London, Oct. 23.—With a view of apparently meeting recent press attacks on "The Starving of the Navy" the admiralty has issued a circular to the navy which indicates, though not very explicitly the intention of distributing the naval strength anew. The circular announces that a distinct fleet will be constituted from the reserve ships to be called the "Home Fleet" under the supreme command of the flag officer with the status of commander in chief and headquarters at Sheerness. The distribution of ships between the channel, Mediterranean, Atlantic and reserve fleets will be altered to permit day since May last, returned yesterday with his party from the Yellowhead Pass.

The Burns party has been working the farthest west of any of the C. N. R. field force. They have just completed the work on the upper reaches of the strathcona and a part of the Minto, carrying the survey right to the summit which marks the boundary line between Alberta and British Columbia.

This survey is the first of the year, so far as the Canadian Northern is concerned at least, and next year's operations will be looked forward to with greater expectancy by the Edmonton public.

The Grand Trunk Pacific party, on the other hand, are still in the field, four parties working in the Yellowhead and three in the river river pass and by the time winter closes in the G. T. P. will have completed its survey from Edmonton right through to Fort George at the junction of the Fraser and Nechum.

To summarize the results of the season's operations, the G. T. P. lead with the surveys, but the C. N. R. have a long haul start with construction.

The road which the Burns has just been surveying to the summit is a continuation of the White Lake line, on which the steel is now being laid and of which sixty miles or thereabout will be completed this year.

From the end of the grade on the White Lake branch to the summit, where the surveys have just been completed is 250 miles, and this stretch will undoubtedly be the scene of the greatest railway activity in Canada next summer.

The steel on the G.T.P. is only a few miles this side of Portage La Prairie, but before the snow falls the grade will have been completed to the west of Saskatoon, and there is no reason to doubt that next summer the Grand Trunk Pacific will move its grading forces to this end and start simultaneously with the C. N. R. on the rush for the pass.

Canadian Northern Completes Surveys

William Burns, who has been in the field for the Canadian Northern Railway survey since May last, returned yesterday with his party from the Yellowhead Pass.

The Burns party has been working the farthest west of any of the C. N. R. field force. They have just completed the work on the upper reaches of the strathcona and a part of the Minto, carrying the survey right to the summit which marks the boundary line between Alberta and British Columbia.

This survey is the first of the year, so far as the Canadian Northern is concerned at least, and next year's operations will be looked forward to with greater expectancy by the Edmonton public.

The Grand Trunk Pacific party, on the other hand, are still in the field, four parties working in the Yellowhead and three in the river river pass and by the time winter closes in the G. T. P. will have completed its survey from Edmonton right through to Fort George at the junction of the Fraser and Nechum.

To summarize the results of the season's operations, the G. T. P. lead with the surveys, but the C. N. R. have a long haul start with construction.

The road which the Burns has just been surveying to the summit is a continuation of the White Lake line, on which the steel is now being laid and of which sixty miles or thereabout will be completed this year.

From the end of the grade on the White Lake branch to the summit, where the surveys have just been completed is 250 miles, and this stretch will undoubtedly be the scene of the greatest railway activity in Canada next summer.

The steel on the G.T.P. is only a few miles this side of Portage La Prairie, but before the snow falls the grade will have been completed to the west of Saskatoon, and there is no reason to doubt that next summer the Grand Trunk Pacific will move its grading forces to this end and start simultaneously with the C. N. R. on the rush for the pass.

C.P.R. BRAKEMAN KILLED

William Stephenson, a C.P.R. brakeman was killed about midnight on Saturday at Hardisty, a small station on the Wetaskiwin branch of the C.P.R. It was at the gravel pit that the accident occurred, and it is supposed that the dead man slipped and fell in front of the train. The engine passed over his head and death must have been instantaneous.

The body was brought from the north last night and is now at Shaver's undertaking establishment, pending instructions from the friends of the deceased.

William Stephenson has been in the west about five years. He had been in Calgary about two years. His home was in Tilbury, where his parents and relatives live.

City Council

HELD REGULAR MEETING

Course of Trunk Sewer May Be Diverted on Account of Isolation Hospital

Under the head of communications Albert F. Ewing as solicitor for Taylor & Darroch presented a claim to the city council last night for \$175 for injuries done to a team of horses which got into a fire at the nuisance ground. The matter was referred to the city solicitor and commissioners to report.

Short, Cross & Biggar, wrote inclosing notice of the Hudson's Bay and Saskatchewan Valley Railway for which their clients are applying for a charter. The matter was referred to the commissioners to examine into the question.

A. T. Cushing wrote stating that as the city had exempted hospitals and as the sanatorium was in the nature of a hospital it should also be exempted. Alderman Griesbach asked if the sanatorium was a charitable institution and being informed that it was not, the letter was filed.

The auditor reported his audit of the books to June 30th as satisfactory.

Alderman Griesbach complained that the audit was not close enough up to the business, and Secretary Kinaird stated that considerable checking had been done up to date.

The commissioners recommended that lights be placed at the corner of Government and Jasper, the corner of Isabella and Syndicate, and the corner of seventh and of Mackenzie and Fourth. The report was adopted.

A report of the commissioners recommending that the widening of Napayo between Pine and Rat Creeks, on the Norwood reserve, be not undertaken, called forth considerable argument. The report stated that some \$1500 worth of property, as recommended by the council, had already been purchased and that \$2100 more would have to be expended to acquire the rest of the property necessary to do the widening. The Commissioners claimed that a street 66 feet wide, properly taken care of would handle all the traffic better than a street 116 feet wide not properly taken care of.

Alderman Smith said that it was merely a question whether the city bought now at the present price or later at a higher one. The city would eventually have to buy the property in order to widen the street.

Alderman Griesbach said it looked as though the city had switched its policy as it spent \$1500 to widen the street and the commissioners now recommended that the proposition be dropped. He supported Alderman Smith.

Ald. Mays said that for the sake of uniformity the street should be widened to the full width of 116 feet as far as Rat Creek.

Acting Mayor Picard said he did not like the widening proposition at all. Napayo south of Rat Creek was 66 feet. By continuing the 66 feet to Pine street would be little different to commencing the 116 foot street at Rat Creek.

Alderman Griesbach pointed out that several streets converge at this point and Alderman Smith added that Napayo at Rat Creek finished at a boulevard. Some time later the residents of Napayo or Norwood would petition for the 116 foot street to this boulevard and they would be up against a large expenditure.

Alderman Mays moved that the report be referred back and that the commissioners take steps to complete the purchase of the property to widen Napayo from Pine street to Rat Creek. The motion was carried.

The commissioners recommended that the tender of the Standard Plumbing Company be accepted for the heating and plumbing of the new isolation hospital. The price was \$3999 and only one tender was received. The tender was accepted.

Alderman Griesbach pointed out that the new trunk sewer is projected to

go very close to the isolation hospital, and he thought that it was too dangerous near. He argued that the sewer should be diverted.

Alderman Smith moved and Alderman Manson seconded that the commissioners be requested to attend to this matter immediately and take precautions by diverting the sewer if necessary.

Property holders on Jasper west of Eighteenth street asked that a six-foot plank sidewalk be extended from the end of the walk at Eighteenth street to St. James street, thence north on St. James to Athabasca and west to the railway line on Athabasca.

Mr. Gilbert, of Killam & Gilbert, spoke in favor of the petition. It was referred to the commissioners.

A six foot plank sidewalk was granted to Cliff street.

Alderman Mays made a motion that the commissioners be instructed to put in a cross walk from the Government buildings to the National Trust corner.

Alderman Griesbach said he had tried to get that once before but cold water had been thrown upon the proposition by the commissioners and he considered himself thoroughly sat upon and shut up. He and Alderman Mays voted for the walk on Alderman Smith and Manson against it. Acting Mayor Picard voted it down on the tie.

Alderman Mays made a motion that the commissioners be instructed to put in a cross walk from the Government buildings to the National Trust corner.

Zinc Deposits

OF BRITISH COLUMBIA

Commission Reports To The Government On Their Extent, Value And Means Of Working

(Bulletin Special)

Ottawa, Oct. 23.—The commission appointed by the government to investigate the zinc deposits of British Columbia have made their report to the department. They find that there is a large amount of paying zinc deposits in the western province which could be readily developed. The cost of mining was placed at \$350 for every ton of material taken from the mines. If the details set forth in the report are followed mines can be run at a profit. Several business schemes for mining are set forth in the report. The report also shows that the zinc ore of British Columbia can be highly concentrated by magnetic treatment. The question of smelting in British Columbia or elsewhere is minutely treated in the report and it is recommended that coal can be procured in either of the provinces named for between \$1 and \$2 a ton, a much lower price than can be obtained in the adjoining republic, and since one ton of ore requires approximately two tons of coal for smelting, this is no small item to be considered.

Two Calgary Men Killed

Calgary, Oct. 22.—Willie Henderson, aged 29, was found near Midnapore yesterday afternoon shot in the head by a shotgun. On Saturday morning he and a friend, William Dean went out to Midnapore to hunt. They spent the morning and part of the afternoon hunting. At a certain point they decided to separate, Henderson to drive along in the rig and Dean to walk around a slough, the meeting place to be Pine Creek bridge.

Dean went to the Pine Creek bridge and for some time, but no person turning up he walked over to Midnapore and came in on the train. He was surprised to find that his friend had not returned and all were alarmed in the morning when he was still absent.

The police were informed and started out. They found a dead body of the young man on the prairie a short distance from the spot where he and Dean had separated. The horse was found about a mile away. The fatal wound was over the left eye. The shot was not scattered. The appearance of the wound indicated that the boy had probably been dead for some time when he was shot. The gun between his legs pointed to the ground and when in that position it had gone off with such disastrous results.

The young man was tall, thin in the freight office of the C.P.R. He lived with his mother at 1019 Third street east.

Stettler Rancher Commits Suicide

Died In The Chair

FROM INFLUENCE OF ETHER

Lumberman Dies Suddenly In A Saskatoon Dental Office

(Bulletin Special)

Saskatoon, Sask., Oct. 23.—An unfortunate affair occurred in the dental office of Dr. Belys this afternoon. A patient named P. Madison was in the chair and was under the influence of ether to permit of an operation. The drug, however, was too much for him and he succumbed. Drs. Stewart, Brown and Weaver were hastily summoned and worked for two hours in an effort to induce respiration, but all to no avail. Madison was a big husky fellow twenty-four years of age. He has been working in a lumber camp near Melfort until about a week ago. He came here yesterday. It is probable that an inquest and post mortem examination will be held.

THE QUEBEC BY-ELECTION

(Bulletin Special)

Quebec, Oct. 23.—The majority of Liberals in the by-election in the County of Quebec is given as 890. The result is no surprise to the old guard Liberals of Quebec who in large numbers voted for the Independent candidate as a protest against alleged indifference at the hands of the administration at Ottawa. Those who rejoice over the result of today's election will have to do so on the grounds that Laurier was "too British for them." In the campaign Mr. Bourassa made no secret that his appeals to the French Canadian electors was purely on French grounds.

PAVING MATERIAL BURNED

(Bulletin Special)

Regina, Sask. Oct. 22.—A spectacular blaze occurred today. A sidewalk of used in connection with the laying of concrete block pavement caught fire and ignited a big pile of inflammable blocks on a vacant lot on Ross street. The loss will be \$500.

On Saturday evening at Summerbury Mr. Barbour was robbed by a sneak thief of \$1200 which was to be used in paying for wheat.

Threw Himself In Front Of A Moving Freight Near Coleman

(Bulletin Special)

Fernie, B. C., October 22.—Another horrible attempt at suicide committed suicide near Sentinel, a station on the Canadian Pacific Railway between Crow's Nest and Coleman, yesterday afternoon by throwing himself in front of an east-bound freight train which was going at full speed. The whole train passed over his body. On his body was a letter informing the public that he intended killing himself either by blowing himself to pieces or by some other violent means and that he wanted to be buried on his ranch near Stettler, Alberta. Erickson was a young man who formerly tended bar at Blaine. He had been despondent for some time.

ANOTHER ATTEMPT

(Bulletin Special)

Another horrible attempt at suicide took place at Lundbreck yesterday when Thomas A. Harvey, a coal miner, dashed through a plate glass window in a fit of insanity, cutting his neck severely. His wounds were bound up and he was sent off to Macleod jail. On his way he attempted in several ways to finish his life.

CONSERVATIVE VETERAN IN TOWN

Sir Mackenzie Bowell, K.C.M.G.P.C., is in the city today. He came up from Calgary last night in company with Senator and Mrs. Loughheed. He is on his way to visit his son J. C. Bowell, collector of customs at Vancouver and just came up to see Edmonton. "It is just for pleasure" said Sir Mackenzie with a genial smile "and we are enjoying ourselves."

It is twelve years since Mr. Mackenzie first visited Edmonton and this makes his third visit. He says he is in no way astonished for this country and city is bound to grow.

He had nothing to say regarding the outcome of the recent conference of the Provincial Premiers. "The papers know more about that than anybody else" he said. Sir Mackenzie had not heard the result of the election in Quebec and thought it might be construed that the election of Rabbittie signified that the grip of Sir Wilfrid Laurier was loosening, although he was not familiar with local conditions in the riding, which might alter the case.

After Franchises

FROM VERNILION COUNCIL

Company Wants Franchises For Telephone, Electric Light and Power, Street Car System, Water and Sewer Systems

Vernilion, Oct. 23.—A regular meeting of the town council was held last evening, when the mayor and all the councillors were present. The chief business of the evening was the consideration of the application of the Alberta Power, Light & Supply Co., Limited, to have a bylaw passed which will give them the exclusive right, for a period of twenty years of carrying on the business of electricians, mechanical engineers and manufacturers with the object of establishing a telephone, electric light and power system, an electric street railway, and a waterworks and sewerage system. There was a great deal of discussion on this proposition and it was finally referred back to have clauses inserted to the effect that the franchise was to be established in nine months, the high plant in a year and the water works at a year's notice from the council. The council also wish to control the rates for telephone, light and water. The electric railway is to be established at a year's notice from the council after the town has reached a population of five thousand. The matter will again be brought up for discussion on Monday next.

WOOD SUPPLY OF THE WORLD
Farmers' Union
United States Consul William C. Teichmann, of Elbenstock, reports concerning the world's supply of wood to the effect that the demand instead of diminishing, as was expected, when coal came in as a substitute for wood, has gone on increasing until the quantity of a continued supply to meet the present rapidly increasing rate of consumption is a very serious problem.

North America, Siberia, Africa, India, China, Korea, and South America still contain great unutilized and almost unknown forests. Nevertheless, it would be well not to exaggerate the dimensions of these wood supplies. Many African forests are really composed of nothing better than thin bushes, and Siberia is already being systematically subjected to deforesting which will also begin in Korea in the near future.

North America, however, once the possible wood storehouse for the world, has not enough wood to supply its own demand, notwithstanding its 506,533,361 acres of wooded area. Even now it is dependent upon Canada, which, with its 728,133,000 acres of forests represents probably the largest single area of any country in the world. Although large territories of forests, especially in China, Korea, India and South America, remain to be utilized, it is certain that the question of the future wood supply of the world, now attracting the attention of economists, will continue to excite great interest. The continuation of the present wood consumption, without comprehensive reforestation, will, within a century at the latest, result in a great and very important scarcity of the wood supply.

FARMERS' CENTURY

C. C. James, Deputy Minister of Agriculture for Ontario, says that the 20th century is going to be the farmers' century. Last century was the century of manufacturing and transportation. The present century will witness enormous and intensive development in agriculture. He says:

"The young man who stands today looking for a future for himself, and asking which line is most promising, what field is there that will give him the greatest scope for the development of his faculties, has before him in connection with agriculture a more promising field than in any other line of work presents at the present day. I do not think there are going to be as great fortunes made in agriculture as there are in connection with the great transportation undertakings, or great manufacturing industries; but for the great mass of mankind, for the thousands upon thousands who are going into it, there is a greater promise for competition and for enjoyment for the future in connection with our agricultural work than I can see in connection with any other of these lines."

"The people of this country have got it into their heads in some way that the great future of Canada is wrapped up in the development of its agriculture, and the result is that any proposition you can lay before the people looking to the improvement of agriculture receives hearty support. We frequently see these magnificent statements about the possibility of the Northwest and Manitoba. Certainly no country in the world presents today greater possibilities for the production of wheat and flour than our great western Territories."

SUPPOSED SUICIDE WAS MURDER
Chicago, Ill., Oct. 22.—Several days ago the body of Miss Margaret Leslie was found in a room in the Palace Hotel. It was considered at the time to be a case of suicide, but later several features of the case threw doubt on the suicide theory, and an investigation was ordered. Today the coroner's physician declared that the woman was probably strangled to death.

ROLFE & KENWOOD, Auctioneers.

BAD KNEE CURED BY ZAM-BUK

A Footballer's Valuable Experience.

As an example of the value of Zam-Buk in cases of abrasions and injuries to muscles and tendons, as well as to the skin, the recent experience of Mr. Leslie, of Harriet street, Winnipeg, may be mentioned. He says, "While playing football I received a kick on the knee. I had had previous trouble with that knee and expected that I would be laid off, unable to walk, for days. I rubbed on some Zam-Buk however, and, to my surprise and pleasure, it prevented all serious consequences. Before I had used the second box my knee was quite cured! Now, I always carry a box when travelling, for I think Zam-Buk is a blessing to humanity."

Such it has proved on many occasions. Made entirely from herbal essences, it is a purely natural balm. Acne, ulcers, abscesses, sores on the back or joints, piles, scaling sores, itching or chafed surfaces, sore feet, blistered or chapped hands, sore nipples, or all these, as well as for cuts, burns, bruises, scalds and everyday skin injuries, it is a veritable boon. For rheumatic aches, muscle aches and pains, wherever you give it a good word. Of its value to athletes the above case is but one example. Sherrington, the winner of the Marathon race, used Zam-Buk while training, and uses it for bruises, sore feet, and as an embrocation. The leading athletes of the world have expressed their appreciation of its value. All druggists, at 50 cents per box, or post free from the Zam-Buk Co., Toronto, upon receipt of price; 6 boxes for \$2.50. Send no cent stamp and full name and address, and free sample box will be mailed you.

CORRESPONDENCE INVITED

Edmonton Branch : : H. A. GRAY, Agent.

Western News

Vermilion Signal: Hon. Mr. Finlay remained over the day following the fair and was driven north to the Somerset settlement by Harry Bowtell. The honorable gentleman was greatly pleased with the appearance of the country and the confidence of Vermilion residents of the future of their town causes him no surprise.

Prince Albert Times: As a result of the prairie fire which was started by a Canadian Northern Railway train near Madsen recently, and was recorded in a previous issue, considerable damage was done. At Paynton, on the 6th inst. the company was charged by the fire A. M. Black, J.P., R. Higgs, J.P., and W. Stone, J.P., with having caused the fire and was fined \$200 and costs. Considerable evidence was produced by the prosecution, but no defence was made by the railway company. They objected, however, to the jurisdiction of the justices, claiming that the territorial government had no authority to pass the prairie fire ordinance, this being within the jurisdiction of the Dominion government. The company's representative stated that the company would appeal.

High River Times: An instance of the watchfulness and courtesy of the R. N. W. M. P., which makes the force so much thought of in the North West. Some months ago Arthur R. Bond lost seven horses while trailing a bunch to the Buffalo Hills. In all that time he has been scouring the country in search of them, but without success until last Saturday, when he received word from Constable Currie, of Nanton, that he had located five of the missing animals.

Alex. Kennedy of Iley, captured a beautiful Arctic owl on his homestead. The bird sprang at Kennedy after being shot and sunk its claws into his arm. He sent it to Edmonton to be mounted.

Prince Albert Herald: The Rev. Dr. Moore, of Ottawa, who was to have addressed the meeting in the Forester's Hall this evening on the subject of Tuberculosis, was taken ill on the train today between Warman and North Battleford and had to be carried to the Saskatchewan Hotel on his arrival at the latter place.

ONTARIO APPLE CROP
The apple crop in Eastern Canada is summarized by the Farmers' Sun as light to medium. There is a crop in all sections, the hot dry weather of August hastened the ripening of the crop. In Nova Scotia Gravensteins are going at \$1.60 a bbl. to \$1.85. Kings at \$2 at the tree. In Ontario the general price is at 75c for fall stock and winter \$1 to \$1.25. Two thirds of the available crop is now out of the hands of the growers, but large dealers are holding for higher prices.

The quality will not be up to the standard as too long a time elapsed between picking and packing, which will affect the keeping quality. Much of the crop that has reached the British market has consequently been of inferior quality.

FARMERS' NOTES
A bulletin recently issued by the Hatch Experiment Station, gives a valuable illustration of clean and filthy dairies. It gives actual photographs of two cows, one from a clean and the other from a filthy dairy and each looks the part.

An accompanying table gives the number of bacteria found in the milk from the two dairies. In the clean dairy there were found 4650 bacteria in one five hundredths of a pint, while the same quantity from the filthy dairy contained 11,569,000.

U. S. TRADE
Washington, Oct. 17.—Over \$25,000,000 worth of foreign merchandise comes in to the United States each year and is again imported into foreign countries, and of it Canada sends to us and receives back again a wonderfully big share. Let us look at the facts—and it is noteworthy that they are issued in advance of the usual official reports of the bureau of statistics of the U. S. department of labor.

The countries to which this foreign merchandise is exported from the United States are more widely distributed than would naturally be supposed. While over ten and a half million dollars' worth goes to Canada, over five million dollars' worth went, in 1906, to the United Kingdom, nearly two and a half million dollars' worth to France, nearly one and a half million dollars' worth to Cuba, nearly a million dollars' worth to Belgium, and over three-quarters of a million dollars' worth to Mexico, and in smaller sums to many other foreign countries.

The total number of countries and colonies to which foreign merchandise is exported from the United States aggregated 65, and the value of the foreign merchandise sent to them from the United States ranged in 1906, from ten and a half million dollars to Canada, down to ninety-one dollars to Strait Settlements and forty-one dollars to Korea.

Of the three and a quarter million dollars worth of India rubber of foreign production exported in 1906, over two and a half millions went to the United Kingdom. Of the two and a quarter million dollars worth of foreign production exported in 1906, nearly one million dollars went to the United Kingdom, over one half million to Germany, and \$27,461 to Japan.

Of the one and a half million dollars worth of coffee of foreign production exported in 1906, \$178,559 worth went to the United Kingdom, \$607,931 worth to Cuba, \$164,990 worth to Germany, \$200,110 worth to Mexico, and nearly \$100,000 to France.

The value of foreign fruits and nuts exported in 1906, was about one and a half million dollars, of which bananas amounted to over one million dollars in value. These bananas, which were chiefly brought from Central America and the West India Islands, were sent almost exclusively to Canada.

Of the nearly one million dollars' worth of art works of foreign production exported in 1906, nearly \$400,000 worth went to Canada and \$224,231 worth to France.

Codfish of which the imports are chiefly from Canada and Newfoundland is another item of considerable importance in the exportation of foreign products, the total in 1906 being \$181,527 worth, of which nearly all went to the West India Islands, especially Haiti, Santo Domingo and Cuba. Lead in ore and base bullion formed another considerable item, aggregating two and a quarter million dollars, in 1906, of which nearly one million went to the United Kingdom, over half a million to Germany and the most of the remainder to other European countries. Sponges are another item of foreign production exported, aggregating \$152,675 in 1906, and being distributed chiefly to European countries, especially France, Germany, the United Kingdom and the Netherlands.

**Sanitaris****A Health Protector**

Most Typhoid Fever cases are due to drinking impure water. "SANITARIS" guards the whole system against disease.

It prevents Typhoid, because it is absolutely pure.

It prevents Gout and Rheumatism, because it neutralizes uric acid.

It prevents serious Kidney and Liver Trouble, because it cleans and heals and strengthens these organs.

"SANITARIS" used regularly, is the surest and pleasantest way of keeping well. It is a delightful table water—clear as crystal—sparkling and buoyant.

AT ALL DEALERS.

If you want Farm Land for your own use, or for investment, the most profitable kind to buy now is the strictly choice. I have it for sale.

THE QUEBEC COUNTY BY-ELECTION

Lorenz Robitaille, Independent Liberal, was elected in the by-election in Quebec County yesterday over A. W. Amyot the candidate favored by the Government. No Conservative candidate was in the field. The wisdom of the Opposition in not contesting the constituency is amply shown in the fact that with the solid Conservative vote added to the section of the Liberals he was able to secure Mr. Robitaille's majority was 390. And this majority he was able to secure only by appealing to the Liberal vote. Mr. Robitaille of the entire Conservative vote.

THE PROOF.

The Calgary Herald and other Edmonton's large assessment is a column of black letter editorial obviously given to work detriment to this city. The Bulletin took occasion to say that whether or not such were the purpose of the Herald would be made clear by the publicity given by the Herald to the tax rate of Edmonton. The event has justified the statement and justice also the belief that the attention paid to our assessment was paid less for the purpose of correcting any mistake than of values among Edmonton people than of creating a mistaken notion abroad of the real estate value in this city. This is the manner in which the Herald supposedly announces Edmonton's phenomenally low tax rate:

EDMONTON'S RATE

Assessment in \$15,000,000.

Northern City Tax Rate is Low But Assessment is Exceptionally High.

Edmonton, Oct. 19.—The city council has struck the tax rate for the coming year at 10 1/2 mills. This rate is made on an assessment of \$15,000,000.

BETTER TERMS FOR THE PROVINCES

As expected the provincial premier in the Ottawa conference confined their attention almost exclusively to the financial relationship of the Dominion and the various provinces. Practically the only results of the conference aside from the revised financial terms was the resolution that a similar conference be held annually and the announcement by the federal government that the question of including a part of Kewatin in the boundaries of Manitoba would be taken up with provincial representatives next month.

The requests made by the Provincial representatives were along the lines of the Quebec resolutions of 1902 and included, an increase of specific subsidies for civil government and legislation, the payment of the per capita grant of \$30. per head until the population of a province reaches \$250,000 and thereafter \$60. per head and a special allowance of 20c. per head of population for the administration of justice. The two former requests were granted.

The specific subsidies to the Provinces for civil government and legislation on the present basis are—
If the population is less than 100,000, \$100,000.
If the population is 100,000, but does not exceed 200,000, \$150,000.
If the population is 200,000 but does not exceed 400,000, \$200,000.
If the population is 400,000, but does not exceed 600,000, \$250,000.
If the population exceeds 600,000, \$300,000.

On the new basis granted the subsidies on this account will in future be—

	increase.
Ontario	\$240,000
Quebec	240,000
Nova Scotia	190,000
New Brunswick	180,000
Manitoba	180,000
British Columbia	150,000
P. E. Island	130,000
Alberta	150,000
Saskatchewan	150,000

Only the three most populous provinces benefit immediately from the concession regarding the per capita allowance, as follows:—

Ontario

In consideration of the increased grants the conference resolved:—

"1. This conference recommends to each legislature to abolish the special tax on commercial travellers, provided that this recommendation do not apply to any license payable under any act concerning the sale of intoxicating liquors."

"2. This conference also recommends that the legislatures of the several provinces shall make no discrimination in the taxation of companies incorporated by the Dominion and companies incorporated by the province wherein such tax is imposed."

(As to the second part of the above resolution Mr. Whitney and Mr. Murray stated that they desire to consult with their colleagues before consenting to it. Adopted.)

As far as Alberta is concerned, we secure immediately an increase of \$50,000 per year in our grant. And when our population exceeds \$50,000 will share with the other provinces in the improved per capita allowance. Under the present arrangement this is the maximum population on which the per capita grant would be calculated, but under the new arrangement this limit is removed and the grant is calculated on the actual population however large that may become.

THE CUBAN CYCLONE

More Details of the Storm Which Swept Havana

(Bulletin Special)

Havana, Oct. 20.—It is estimated that the loss of life in the storm would have been greater proportions had it not been for the timely warning given by Father Levest Guanota. He is a noted weather observer of Berlin college. He telephoned to Columbia camp at 7.30 o'clock, an hour before the storm descended that a cyclone was coming, and his warning was immediately heeded.

Havana, Oct. 20.—A storm of unprecedented severity, accompanied by a torrential downpour of rain, swept over Havana and Pinar Del Rio provinces Wednesday night and resulted in twenty deaths in this city and the serious injury of a dozen or more persons. The damage is estimated at \$2,000,000. The dead are all Cubans of the poorer class. The United States cruiser Brooklyn dragged her anchor until her stern grounded in the mud off La Cienega. She got off this morning without injury.

The storm caused havoc and confusion among shipping interests. Many buildings were badly damaged, and nearly all the trees in the city and suburbs were uprooted. The two thousand American soldiers and marines at Camp Columbia were put to great inconvenience. Nearly all the four hundred tents in the camp were blown down, but there was little actual damage.

Harry Fordick, teamster with the 28th Infantry from Sioux City, Ia., sustained probably fatal injuries. He was crushed by a tree which fell through the barracks in which he was sleeping. Fred Suttle, of Fort Snelling, had his head seriously injured. And Thomas Somers, of Reading, Pa., sustained serious injuries to his back.

One hundred and fifty tobacco barns in the Alajuar district have been destroyed. The recently planted tobacco crop has been seriously damaged. Previous damage is reported from Guira section, the centre of the banana and pineapple growing industry. These crops are said to have been practically destroyed.

Many small farmers have lost their all, and are in great distress. Matanzas City was practically uninjured, only a few houses there sustained damage. No loss of life has been reported from outside Havana, but five persons were injured by lightning.

In Havana City the building of the University of Havana sustained damages amounting to many thousands of dollars.

The light wooden structures over the sea baths at Vedado were badly wrecked. The great unoccupied brick building covering the old united railroad wharf near La Regia was demolished. The principal loss of life occurred in a ten-story house in popular street, occupied by many poor families. The projecting upper portions collapsed first, and then the three floors fell. Eight of the inhabitants were killed and five others injured. Ten other fatalities resulted from falling signs and cornices, contact with live wires or drowning. During the height of the storm there was great alarm among the guests of the Inglaterra and other hotels. Doors, windows and skylights were blown in, and the rain flooded the rooms. The destruction of trees was a most remarkable feature. Throughout the length of the Prado, scarcely one tree remains standing. Havana has thus lost one of its chief beauties, for it will be many months before they can be replanted. The parks were also destroyed.

A Range That Burns All the Coal

MONARCH likely you have been throwing away good coal every day without knowing it. Coal that is only partially burned in the fire box.

Because, with the ordinary range draft, the air current only strikes part of the fire.

Usually the damper door on such a range is situated at one end of the fire box, which makes your fire hot at the draft end and cold at the other end.

Or the damper is perhaps on the left side of the stove, which makes an uneven fire for the same reason.

You are not only losing fuel, but your cooking and baking is unsatisfactory, for you cannot get a uniform heat.

Now, the draft in a Monarch Range is entirely different.

Instead of one damper door, there are two, one in each end of the fire box.

These form a double or Duplex Draft, and both are regulated by the same handle.

So you get two direct currents of air at the same time, and your fire burns smoothly and evenly.

Monarch
The Stay Satisfactory Range

You open both drafts simultaneously and shut them off the same way.

The draft striking the fire from both directions consumes all the fuel, and gives you all the heating power from the coal.

When you empty the ash-pan in a Monarch Range, you are throwing away ashes—and ashes only—not coal.

And in addition to this, the Monarch is constructed of Steel and Malleable Iron, which can be riveted so tight and solid that no air-leaks can possibly happen as they do in cast iron ranges.

The top is Malleable Iron, polished and bright. You can keep it clean without smearing your range with blacking which gets on the cooking vessels, to make more work for you.

A \$1.00 Cook Book Free

The Monarch Cook Book, written by Mrs. Helen M. Thompson, an acknowledged authority on domestic science is a real book, not a cheap circular, 244 pages bound in cloth, contains a book that would cost \$1.00 at the book store.

It contains 550 recipes, many of them new, all simple, easy to make and inexpensive. The practical menus for the whole year and many valuable hints on diet and marketing.

You can get it without cost if you intend buying a range or cook stove within a year. HOW TO GET IT. Cut out this advertisement, mail it to the Malleable Iron Range Company, Beaver Dam, Wis., and tell them WHEN (nearly month if possible) you expect to buy and you will receive this valuable book free. As the edition is limited, write now.

The Capital of Sunny Alberta

(From the Scottish-American.)

"In the heart of the western province of Alberta, in the Dominion of Canada, is situated one of the brightest and enterprising growing young cities of the Dominion. The province contains 281,866 square miles of arable land, with little or none of it waste and barren, watered by the broad Saskatchewan river, rising in the Rocky Mountains, flowing for a thousand miles well to the northern part of Alberta, in a tortuous route, between the 52nd and 54th degrees parallel of latitude, eventually finding its way to Lake Winnipeg. Its principal tributaries are the Battle and Vermilion rivers. Edmonton has a population of 12,000 though but a few years ago it was only 3000.

"Not at all like prairie provinces, it stands in a commanding position a few hundred feet high up on a bluff. On the heights many of its wealthy citizens are building palatial homes, commanding a delightful view of the Saskatchewan River, adding beauty to the scene when lost to view on the well-wooded lands of spruce and balsam of Gilead.

"The drainage and sewerage of the hundreds of towns that are springing into existence with the influx of immigrants, form a serious problem, as well as a water supply. Edmonton is pre-eminently situated to be the making of the finest city of all the prairie provinces, with its beautiful commanding position combined with its facility for drainage. Further north than any town in the Dominion, touched by a connecting railroad, it lies between the 53rd and 54th degrees parallel of latitude, 113 meridian. Although farther north by three and one half degrees than Winnipeg, the climate is moderate in temperature, influenced by the Chinook or warm winds that blow from the northwest, coming for a thousand miles from the Japan current, and, almost incredible, crossing the Rockies before it touches the Great Plains, snow evaporating and disappearing as it by magic when the Chinook blows. The cold does not become intense, as in Manitoba, and is of short duration, with a light snow fall, a prevalence of azure skies with nebulous of light, airy clouds, a fair amount of showers prevailing through the spring and lasting well into August. Although in some high sections, disastrous hail storms come in summer, there are very beautiful sunsets, which are depicted by Vernon in some of his famous water colors. The sunrise seems quick on the prairies, gilding the sky with a blood-red and orange, and slightly tingling the eastern horizon as well.

"Vegetation is vigorous, the flora of

the plains large and robust. The anemone is the harbinger of spring. Great patches of the purple and white anemone, eight inches high, is a picture to look at. Nowhere else the campanula ("the Scottish blue bell") grow so vigorously as in Northern Alberta. I have seen a field literally blue with them. In September the sea (golden-rod) is in great patches of golden color, as so the astragalus, rich in thick purple flowers, and is scattered over the prairie with a beneficent hand.

"Blood Cress and Blackice! Indians, picturesque wigwags the same, though fewer in number, than were on the plains when the Hudson's Bay Company, two hundred years ago built their forts on the most commanding points of vantage.

"Fort Edmonton being one of the finest, is pre-eminently the great fur depot in the Far North, and stands yet today. Many hundred thousands are annually paid in Edmonton for the harvest of furs that come in from the North.

"Alberta cannot essentially be called a prairie land. It is undulating to a degree, of a rich sandy loam, and is certainly a country for mixed farming. Both spring and fall wheat can be successfully grown, twenty-five bushels to the acre being a fair average, with seventy bushels of oats. Coal mined approximately to the city is delivered at \$3.50 a ton. In the north deposits of salt, petroleum and minerals are known. Natural gas is known to exist near the city, with timber in plenty at the foot of the hills. Until within the last few years this great country surrounding Edmonton for hundreds of miles has been uncultivated, excepting the scattered holdings of Scotch and French, and their descendants, the half-breeds, the result of the Hudson's Bay outposts, which were composed principally of the hardy Scotch and the hardy French, from the lower provinces, skilled in portage work. Now it has prospects of more than two railways. For years past it has had only the Canadian Pacific Railway, which was extended two hundred miles from Calgary, to the south of Edmonton. The Canadian Northern Railway came into Edmonton this year from a distance of 835 miles. The Grand Trunk Pacific Railway is making rapid strides to reach Edmonton, and eventually pass through the rich Peace River country, to come out on the Pacific Ocean terminus in the north, opening up a land rich in mineral, timber and farming, with great coal deposits. Little wonder that wealthy capitalists from Canada and the United States have made

heavy investments in the city of Edmonton.

Edmonton stands supremely alone in its municipal system of taxation, applying the single tax (Henry George) system of taxation, only the land being taxed—no buildings, however costly, are taxed. They own their water, light and telephone systems, and will build their own street railways, though, perhaps they may not operate them.

The Scots and the French predominate in the city of Edmonton, and are the largest property holders in the city. John McDougall, of the firm of McDougall & Secord, a very wealthy Scot, is a characteristic type of his country. He is a business man of undoubted integrity, and a staunch Presbyterian. Ross, McDougall, McDonald, Douglas, McLeod, etc., are common and conspicuous names above the scores. French names, such as Gariepy & Lesard, Revillon, and Larue, are also much in evidence. Mr. Gariepy, of Gariepy & Lesard, is a grand type of the true French gentleman, in manners politeness and business dealings.

The Scottish flag would be a fitting symbol to fly in the city of Edmonton. The dauntless lion rampant in its field of gold, surrounded as it is with its border of fleur-de-lis, Edmonton is some day destined to take no second place in the category of the handsome and business cities of the Dominion of Canada. I could advise our countrymen to come and partake of the rich heritage. They have surely an equal right to it, as the wide-awake Americans from the States that are pouring over the border. Using an American phrase I would say—"It is a cracker jack of a country."

WINNIPEG MARKETS

Winnipeg, Oct. 22.—Cash grain—No. 1 hard 75 1-2; No. 1 Northern 74 1-4; No. 3 Northern 69 1-4; No. 2 White 64 3-4; No. 3 barley 41 3-4; No. 1 flax 112 1-2.

THE NEW FRENCH CABINET

Paris, Oct. 22.—M. Clemenceau has begun the formation of a cabinet. He offered the foreign office portfolio to M. Poincare minister of finance in the Sarrien administration who declined. M. Callaux who was finance minister in the Waldeck-Rousseau cabinet has accepted the portfolio of finance. It is certain that M. Brand, minister of public works, M. Ruan, minister of agriculture, M. Thomson, minister of marine, and M. Doumergue, minister of commerce will remain, and that Gen. Piquart will get war portfolio. A new ministry of labor will be created with M. Viviani, the well known socialist at its head.

SOLE AGENT OPPOSITE REVILLON'S

THE RACE TO THE PACIFIC. (From "Canada.")

The main line of the Canadian Northern railway is still being rapidly extended westward from Edmonton towards that goal of all enterprising railway men, the Pacific. The grading has not been found to be very heavy, averaging about 15,000 cubic yards per mile; but the line cuts across the general direction of the streams and water-courses, and as there are generally in deep ravines there are a number of high banks and moderate-sized trestles. The country is partly flat, but mainly rolling prairie, making a continuous series of short cut and fills between the ravines. There are only four large steel bridges, but these are all notable structures. All across the Saskatchewan river. As the railway runs through an entirely new country, the towns are few and small, but they are rapidly increasing both in number and population.

Regardless of future developments—which include a line to James Bay, or Hudson's Bay, and a series of connections which not only give a through route from the North-West to the Great Lakes, but will also link up the line to the St. Lawrence river ports of Montreal and Quebec—the existing line through the North-West and Manitoba, and terminating on Lake Superior forms in itself an important trunk line, opening up practically new territories, and affording additional facilities for the handling of the immense and increasing grain traffic. It is worthy of note that a region which twenty years ago was thought to be far beyond the line of cultivation is now found to be capable of growing enormous quantities of wheat of the finest quality, and the settlement are being pushed farther and farther northwards every year. The Canadian Northern has already an aggregate of over 2,785 miles west of the Great Lakes (exclusive of its lines in the Maritime Provinces), but of course, the most prominent feature of its development is to be found in the west. From Lake Superior at Fort William, Ontario (where it has extensive terminals and a concrete grain elevator of 7,000,000 bushels capacity), the line extends to Winnipeg (438 miles), the headquarters of the system. From Winnipeg the line extends to Dauphin (178 miles), whence two practically parallel lines are run. One of these continues to the north-west corner of Manitoba, and thence almost due west to Prince Albert (540 miles from Winnipeg), which was reached by the track in January, 1906. The other line runs north-west from Dauphin to Edmonton (225 miles from Winnipeg), and this point was reached by the track in November, 1905. The company has a charter for a line from Edmonton to the Peace River, the surveyed route for which gives a low-level pass through the Rocky Mountains. The continuation of the line to the Pacific coast seems most probable, but at the present time the rapid settlement of the country along the existing line makes the exact extension of rather secondary importance. The development of the system has been mainly the work of Mr. William Mackenzie, of Toronto, who is the president of the railway company.

The method of track-laying adopted by the Canadian Northern is a remarkably interesting and expeditious one. The grading, in the first place, is mainly done by drag scrapers, steam shovels being only occasionally used. The earth is a soft black loam, underlain by clay or gravel, and in some places the ground is of loose sand. The width of roadbed is 16 feet on fills and 22 feet in cuts, and the ties are of hewed tamarack. The material is carried by a track laying train, consisting of a pioneer car at the head, flat cars of rails, and the engine, behind which are cars carrying ties and bridge material. The full number of ties are laid ahead of the train, and the rails are spiked at joints, quarters and centers. The work of completing the belting and spiking is kept close to the rear of the track laying train. On the pioneer car is an elevated platform or cabin for a man with a flag to signal the engine-men when to move ahead as each rail length of track is laid. The rails are run to the front in roller ways or chutes attached to the sides of the flat cars, and the ties are hauled ahead of the train by teams, about fifty teams being employed. The sidings for material trains were about seven miles apart. The boarding train consists of sleeping and dining cars, timekeeper's car, with stores, supply cars, and a car for the general foreman. Double

deck sleeping cars are used on some of these trains.

All bridge material, such as piles, posts, caps, stringers, etc., is kept on the rear of the track laying train, and hauled ahead by teams to the various structures. The timber is erected by bridge gangs ahead of the track, and the track laying train crosses the bridges when laid with half the complement of stringers and common track ties. The track laying gang is exceptionally large, averaging about 240 men, who work from 7 a.m. to 6 p.m. The gang can lay an average of 2.25 miles per day, or 17 miles per week, the maximum record being 3.7 miles in one day. Three (and sometimes four) gangs follow the track-layers, surfacing and lining the tracks; each of these gangs consisting of 80 to 100 men.

As already stated, the only important steel structures are the four large bridges over the Saskatchewan river, which flows through a deep valley, largely in sandy soil. The bottom is of sand, affording good hold for pile foundations. All the piers and abutments are of monolithic concrete construction. The spans are mainly deck trusses, and all the bridges have long and high trestle approaches. The specifications require the use of medium open hearth steel, having an ultimate strength of 60,000 to 65,000 lbs. per sq. in.

The bridge at Clark's Crossing (455 miles west of Winnipeg) is designed for a live load of two consolidated engines of 300,000 lbs. followed by a train of 4,200 lbs. per lin. ft. The steel work weighs about 900 tons, and was erected by means of a derrick car supported at the rail level by a temporary bridge built to carry trains and to support the steel structure during erection. The trestle approaches are 415 ft. long at the east end, and 135 ft. at the west end. Work on the substructure was commenced August 19, 1903, and the erection of steel on December 5, 1904. The bridge was completed March 19, 1905. The bridge at Elbow (first crossing of the north branch, 515 miles from Winnipeg) is designed for the same engine loading as the above, but with a train load of 4,500 lbs. per lin. ft. The trestle approaches are 520 feet long at the east end and 1,475 ft. at the west end. The bridge was completed October 7, 1905. The bridge near Battleford (second crossing of the north branch, 578 miles from Winnipeg) has 11 spans of 106 ft. 6 in. The weight of the steel was about 1,650 tons. Work on the substructure was commenced April 29, 1905, and the steel erection was commenced September 23, 1905. The bridge at Fort Saskatchewan (third crossing of the north branch, 810 miles from Winnipeg) is for both railway and highway traffic; it has four deck truss spans of 156 ft. 3 in., and two 65 ft. girder spans. The live load on the trusses consists of two consolidation engines of 311,000 lbs., and a train of 4,900 lbs. per lin. ft. (the same as in the Battleford bridge), together with 1,200 lbs. per lin. ft., and a 1,000 lb. roadbed for the highway. The trestle approaches are 150 ft. long at the east end and 1,475 ft. at the west end.

What youngster thinks of his stockings!

And when isn't he tearing here and there in his rough-and-tumble playing!

Dominion Brand Stockings

outwear two pairs of ordinary stockings—and are comfortable and well-shaped.

Just try them. Look for the "tag that tells"—on every pair.

BETTER CLASS OF TAILORING Has Conquered the Prejudice Which Custom Generates.

The man who wears a comfort last C width shoe does not of necessity wear a Physique Type C suit of Semi-Ready tailoring, but the man who has studied the reason why he will today pay more for a shoe made on a custom's measure, will understand why Semi-Ready tailoring must of necessity win all the better class of tailoring trade. No tailor can possibly excel the work on a Semi-Ready suit or overcoat, even though it be but a 315 serge or tweed, for good tailoring helps the new physique type system of the Semi-Ready. The physique types A, B, C, D, E, F, and G mean more than mere shoe widths; just as do the five variations of each type and the many sizes of each variation. Kelly & Moore will show the real Semi-Ready label to anyone. It is on the inside pocket of coats, trousers and overcoats.

Stanfield's Underwear

Defies the Cold

Stanfield's Underwear is the most perfect protection against Canadian winters.

It is just the right weight for warmth—yet not too heavy for easy comfort.

Stanfield's "Unshrinkable" Underwear

is made of Nova Scotia wool—the finest in the world—and is guaranteed absolutely unshrinkable.

THE CARE OF MR. FOWLER.

Toronto News:—Mr. Fowler's accusation that the Insurance Commission is actuated by petty spite of politics can hardly be sustained. We believe the inquiry has been conducted with commendable fairness and thoroughness and that the commissioner has fully justified his claims. More than that when the commission was instituted it was freely said by critics of the Government that the inquiry was to be only a whitewashing affair, and Conservatives called loudly for a most searching investigation. We believe that no conservative can justly accuse the members of any attempt to conceal evidence. They have lived up to the letter of their commission, aided greatly by the untiring energy and, at times "unpleasant" curiosity of Mr. Shepley, Mr. Fowler and his friends. We believe that the real commission was the "probe fearlessly." It is not becoming in Mr. Fowler to object when he ascertains that his own has been granted.

If the commissioners had been astounded upon persecuting Mr. Fowler because rampant and offensive political views they would have accepted the suggestion of Mr. Shepley that he be sent to jail for contempt of court. He has treated the commission with the impudence of a Prince Rupert. He has declined to obey a summons to testify because business called him away, according to believe that the commission was a mere bagatelle compared with the momentous requirements of his own affairs. It becomes him to meet at the Commission or to make contemptuous insinuations as to the motives of the commissioners, for it is by their mercy and consideration that he is not reflecting upon his conduct behind the bars. He has testified already that before the Canadian Pacific lands were allowed to run and his friends the price had been raised by the company to \$5.00 an acre. Yesterday a couple of interviews with Sir Thomas Shannagnessy the former price of \$5.00 was fixed. This is not the usual method of doing business adopted by the Canadian Pacific Railway. It involved on 24,000 acres a loss of \$30,000. If the applicants for the land had been ordinary business men unconnected with the Canadian Parliament, they would have been able to induce the railway officials to "knock off" over a quarter of a million dollars! It might be possible, but it is certainly not probable. Again Mr. Fowler admits that he and his associates had received confidential information from Mr. D. D. Mann concerning the route Mackenzie and Mann were to assist these speculative kite-flying members of Parliament in financing the deal with the Canadian Pacific.

Mr. Fowler said in the box "We do not consider that being members of Parliament should enter 'us' from entering into a legitimate enterprise." But he highly unlikely if these men had not been members of Parliament that they would have again been able to secure such profitable access to information as Mr. D. D. Mann gave them. Neither Mr. Mackenzie nor Mr. Mann are in the habit of telling secrets of such character to ordinary men. A former tips and leavings were extraordinary men in any sense, it was because they were members of Parliament. No one of the three stands out as an intellectual or financial giant. Now Mackenzie and Mann, as well as the Canadian Pacific Railway are constantly before the House of Commons as supplicants for favors. An under-estimated the needs of accountants they would be anxious to oppose view of the special favors extended to these members by both railway companies in its response to their any request by either of these two roads? It seems very plain that Mr. Fowler and his friends used their public position to make personal gain and to this end were willing to place themselves under obligation to two great corporations who are constantly asking Parliament for favors. That we take it, is not a legitimate enterprise.

WESTERN CANADA AND THE WESTERN BLOCK.

The Montreal Star says that George Brown on certain occasions displayed a prophetic insight into the future greatness of Canada, but that this vision did not always dominate his judgment. While he was a member of the Coalition government formed to carry out Confederation, his vision of Ottawa where the new Government buildings were approaching completion. He wrote to his colleague, Sir John Macdonald that they were too big—five hundred years in advance of the time. There is no doubt that he was wrong, that the buildings were found to be too small; that Alexander Mackenzie had to build a new wing to the western block, and that afterwards Langevin block and the printing bureau were built, that the Government has been obliged to rent accommodation in Ottawa, and that an edifice to cost \$1,500,000 must be constructed in order to keep pace with the growing demands of administration. There is no doubt that Mr. Brown's prediction for the officialdom of the Dominion while Sir John Macdonald thoroughly recognized them. This is easily explained by the fact that Macdonald, from 1837 to the close of his life, was almost continuously in office while Brown's official life was confined to a day or two in 1858 and a few months in 1864 and 1865. Brown was a journalist, a man of the platform, a tribune of the people. Here he was as much the superior of Macdonald as

Macdonald was in his regard to the requirements of official life.

For instance Brown was a long way in advance of Macdonald in recognition of the importance of Western Canada. He referred to the matter in his maiden speech in the Parliament of Old Canada in 1857. He published in 1852 an article showing an acquaintance with the west in 1858. The reform modern, an article that would stand the test of the limelight of 1896. He carried on a campaign for the annexation of the West in 1856. The reform convention of 1857, of which he was a leading spirit advocated that policy.

On the other hand, as late as 1865, after the minds of our public men had been broadened by the ideas of Confederation, Sir John Macdonald was strangely blind to the advantage of extending the boundaries of Canada westward. He saw that it was important.

LOCAL

Public school concert in the Thistle rink at 8:30 p.m.

The walls of the Separate school are completed and the roof is being put on today.

A. A. P. McDowell, formerly in the job department of the Bulletin, leaves tomorrow for Camrose, to take the foremanship of the Camrose Mill.

The Edmonton hockey club will meet in the young Liberal club rooms on Friday evening at 8:30 p.m. The annual election of officers will take place and plans for a vigorous hockey campaign discussed.

Jack Morton, who lately disposed of the Mariaggi Cafe to John Hart, will shortly open up a new restaurant on the corner of Third and Jasper street in the building erected by A. W. Cameron.

G. J. Macdonald, one of the heaviest mercantile men of Revelstoke, B. C., is in the city today taking a look at Edmonton. He likes the town and may decide to desert the mountain centre for the Alberta capital.

The Canada Permanent Mortgage Association are distributing to their customers a beautiful calendar for 1907. The calendar has a very accurate map of the Dominion of Canada showing the provinces, recent surveys and other useful data.

Sir Mackenzie Bowell, Senator, and Mrs. Loughheed left this afternoon for Calgary, by Superintendent Jamieson's private car. This forenoon the party was driven about the city by Mr. S. A. Gordon-Barnes, of the Imperial Life, of which company Sir Mackenzie is president.

Two more of the baseball fraternity have settled down to a commercial existence. "Deacon" White and Joe Crist have purchased the Club cigar store on Jasper avenue. They will take possession today and contemplate some extensive improvements in the premises.

Mr. Dan Noyes has left at the St. James' hotel a turpin which weighs 22 pounds. It measures 32 inches around the girth and 35 inches the other way, and it is all solid. The big turpin will be shipped east and exhibited in La Patrie office in Montreal.

The workers' committee in connection with the house to house visitation of the city, to be made shortly, will meet in Queen's Avenue Presbyterian church on Thursday evening of this week at eight o'clock. It is hoped that there will be a full attendance of the members of this committee.

Grading and levelling operations are in progress on Jasper avenue between Fourth and Sixth streets in conformity with the level of the new granite sidewalks. There still remains a ridge in the centre of the street that is higher than the sidewalks, which will be removed when the paving begins. The fifteen ton steam roller is in use today packing the loose earth.

Last evening about six o'clock another runaway occurred, resulting in the loss of 45 milk bottles, with their contents, and serious, if not fatal injury to one of the horses. A team belonging to the Prevay Pasteurized Milk company ran away from the Hudson's Bay stores east, on Jasper, and collided with a dray wagon belonging to the City Transfer Co., as it was turning on to Jasper from McDougall street. The horse struck the dray with its breast and may die. A nephew of Mr. Prevay was driving the team and left them tied.

SOCIAL AND PERSONAL

Senator and Mrs. Loughheed, of Calgary, are in the city.

Dr. Mackenzie, of Winnipeg, is in the city.

Sir Mackenzie Bowell, ex-premier of Canada, is a guest at the Alberta.

W. R. Hull, of the Gallagher-Hull company, is in the city and staying at the Alberta.

Dan. Campbell, of Edmonton, is spending his vacation with his brother in town. —Ponoka Herald.

Mrs. K. W. McKenzie, who has been visiting at the coast since May, returned home on Monday evening.

Mr. Hamilton Douglass, who has been in the government telegraph office in town for some time past, has secured a position in the C. N. R. depot.

Regina Standard: Mrs. Ferris, the wife of Dr. Ferris, of Edmonton, and who has been visiting at her old home in Toronto, passed through the city this morning on her return journey. Before her marriage Miss Swanson, as her name was then, lived in Regina, and she was met at the train this morning by her old friend, Mrs. A. D. Wright.

ity News

PUBLIC SCHOOL CONCERT.

Harold Jarvis will sing in the Thistle theatre tonight at the concert given under the auspices of the pupils and teachers of the public schools. Everyone who knows Jarvis will be there if it is possible for no Canadian vocalist has a wider circle of admirers than he. The wonderful range and power of his voice, rich, resonant, swelling to full toned thunder or subsiding to a musical whisper has never failed to charm his audiences.

Mr. Wallace Graham will accompany him. He recites with a finish and individuality all his own that indicates the care and training of the true artist.

The best local talent in the city will assist. Misses Crawford and Kempt will give instrumental duets. Harper's orchestra will furnish selections before the program begins and during intermission.

Miss Crawford will play the accompaniments for Mr. Jarvis.

DIFFERENCES ADJUSTED.

At last night's council meeting a difference between the contractors on the trunk sewer and the city engineer and commissioners with regard to the quality and percentage of material to be used in the concreting, was adjusted by the city allowing \$16,369.50 over the contractors' price.

The contractors claimed that the specifications called for two parts of sand and five parts of gravel, mixed together, which should then be mixed with cement at the proportion of seven to one.

The engineer claimed that the specifications required that one part of cement be mixed with five of gravel and two of sand, the whole of which, owing to the sand and cement filling the interstices, would only make five parts after mixing.

The contractors also claimed the right under the contract to use river sand, which the engineer pronounced as unsatisfactory.

A compromise was effected, allowing the contractors \$1.90 extra per lineal foot on the 10 foot section, \$1.23 on the eight foot section, 55c on the five foot six, 41c on the five foot, 21 cents on the three foot and 15c on the two foot six, the total aggregating \$16,369.50.

SMALL BLAZE LAST NIGHT.

Fire broke out last night in the Empire theatre at 9:45. The alarm was promptly given and the brigade was soon on the spot with hose wagon and chemical. It was unnecessary, however, to use the hose, as the fire was quickly extinguished by the chemical. The singularly prompt and efficient action of the brigade prevented what might have terminated in the destruction of the adjoining building, including the office.

The fire occurred during the second performance of the evening in the cinematograph machine, which is operated from an open arc lamp, a strip of celluloid, a highly inflammable material, becoming ignited. The operator seized the burning ribbon of celluloid and threw it to the floor below which set the curtains at the entrance aflame.

The damage amounted to about \$750, caused by the destruction of several hundred feet of cinematograph films. Mr. Fibiger, who conducts a bookstall and confectionery, suffered considerable loss.

Look for this tag on the cloth of every Suit and Overcoat you buy.

It guarantees wear and service because it goes only on cloth that is pure wool.
